

OnlineSeminar facilitates  
digital interaction with Healthcare  
Professionals across the globe.

Webinars

Conference Broadcasting

E-learning

Our platforms offer endless possibilities to  
increase engagement, save on travel time,  
broadcast news, and keep content accessible.

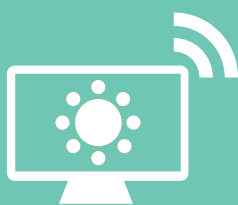

## Webinars

The webinar software from OnlineSeminar has a wide range of possibilities to interact with your Medical Professionals across the globe. Utilize the incorporated functionalities, and you will increase engagement with your target audience in your webinar and gather relevant data. OnlineSeminar would be more than welcome to assist you in organizing your webinar.

During all your webinars data is collected, giving you the opportunity to generate valuable insights in your audience's knowledge and experience; personal information of your participants, time online, answers to poll and survey questions, as well as the complete chat history of all your webinars.

## Conference Broadcasting

OnlineSeminar has several mobile studio solutions for onsite broadcasting. Whether it's a one camera set up or a talk show setting for an audience of considerable size, we can facilitate a suitable and affordable solution for every broadcast.

OnlineSeminar offers their services around the globe. We can work with your existing conference partners or accommodate a full service conference broadcast setting.

Our platform allows you to reach a global audience, and convey your knowledge and insights to those who were not able to attend the conference. In addition, the OnlineSeminar conference broadcasting solution allows you to create an ondemand archive, keeping your key notes and workshops accessible.

## E-learning

For training professionals who need a trusted platform with deep learning expertise, OnlineSeminar provides a cloud-based learning management solution (LMS) that unifies virtual classroom and webinar capabilities in a secure and scalable platform that can meet your medical education needs.

The OnlineSeminar e-learning solution offers a wide range of features, which allow you to educate and train Medical Professionals on your products and services. You will have detailed insights in progress, success ratios and certification.
